Portfolio: my-portfolio-delta-amber-58.vercel.app

PROFILE

Motivated and passionate IT student currently enrolled in the 8th semester of BS Information Technology. I have 1 year of hands-on experience with React Native and specialize in mobile UI design and Android app development. Eager to apply my knowledge, solve technical challenges, and grow in a professional mobile & full-stack development environment.

PROFESSIONAL EXPERIENCE

1: E-Commerce Mobile App (TechMart)

- > **Architected Cross-Platform Mobile App:** Built a high-performance cross-platform mobile shopping application using React Native and custom Node.js/Express REST APIs.
- > **Authentication & Catalog Search:** Implemented secure user authentication, interactive product catalog with advanced search/filtering, and seamless state management via Context API.
- > **Backend & Push Notifications:** Managed server-side business logic, MongoDB database schemas, and integrated real-time push notifications.

2: IoT Smart Home Security System

- > **Hardware & App Integration:** Developed an end-to-end smart home dashboard & mobile client with real-time hardware tracking using Raspberry Pi 2W & Firebase/Node.js.
- > **Biometric Security & Live Control:** Integrated biometric authentication (fingerprint/facial logic) and live WebSocket-based device control with minimal latency.

3: Flash Chat – Real-Time Messaging

- > **High-Performance Chat Engine:** Built a high-performance real-time messaging mobile application using React Native, Node.js/Express, and Socket.io for low-latency, bidirectional chat communication.
- > **Encrypted Data & Authentication:** Implemented secure authentication & encrypted data flow using JWT (JSON Web Tokens) and password hashing to ensure privacy across user sessions.
- > **Scalable MongoDB Database:** Designed scalable database schemas in MongoDB to handle active user status, chat histories, room instances, and instant message delivery.
- > **Push Notification Alerts:** Integrated Firebase Cloud Messaging (FCM) for background push-notifications, ensuring real-time alerts for incoming messages and call updates

PROJECTS

1: E-Commerce Mobile App (TechMart)

2: IoT Smart Home Security System

3: Flash Chat – Real-Time Messaging

4. UI/UX Android App

Mobile App & Web Apps (React Native || React.js || Node.js)

Designed and engineered professional MyApp-like mobile UI and web interfaces leveraging modular React Native components, custom StyleSheet themes, and robust Node.js backend integration.

EDUCATION

BS Information Technology (Bachelor of Science in Information Technology)

Islamia University of Bahawalpur, Pakistan | Currently Enrolled in 8th Semester (Final Year)

SKILLS

- > **React Native:** Cross-platform mobile app development (Android & iOS).
- > **JavaScript (ES6+):** Core programming language for application logic and async workflows.
- > **React.js:** Modern web frontend development & single-page applications.
- > **React Navigation:** Seamless multi-screen navigation and stack management between app screens.
- > **UI/UX Design:** Custom styling using StyleSheet, responsive layouts, and third-party UI libraries.

SOFT SKILLS

- > **Problem-solving & Debugging:** Analyzing complex errors and optimizing mobile performance.
- > **Team Collaboration:** Effective remote and in-person team coordination & Git version control.
- > **Time Management & Project Delivery:** Meeting project milestones with clean and efficient code.

EXPERIENCE

Equipped with 1 year of practical project engineering experience, currently seeking my first full-time professional opportunity in the field of mobile app development and full-stack software engineering.

LANGUAGES

- > **English:** Intermediate / Professional Working Proficiency (Writing & Speaking).
- > **Urdu:** Native / Fluent.
